

We cordially invite you to an autumn seminar of [UNCE/SCI/006 project](#)

Center for Geosphere Dynamics

7th November 2019 at 2 pm

**Faculty of Science, Charles University, building Albertov 6,
Ložiskové sbírky, room no. 120, 1st floor**

The following junior researchers will present their results:

- **Martina Aubrechtová:** Revision of the long-overlooked cephalopods from the Ordovician of the Prague Basin
- **Adam Culka:** Miniaturized Raman spectrometers and their application in geoscience
- **Radim Jedlička:** Chemical modification of UHP garnets: experimental and natural study
- **Petr Tábořík:** A role of integrated interpretations in the geophysical research of a landscape evolution
- **Klára Michalíková:** Micropollutants originating from dental hygiene

The presentations will be followed by the discussion and light refreshment
